Dear Nkazimulo,

This is just to respond to your email. As far as the information on past or present mining activities in the area, I suggest contacting Harmony Gold directly. More details about this project can be found on EIMS website, i.e., [Public Participation – EIMS](#). The website also includes a background information document, which provides a bit more detail on the project.

I'd like to wish you all the best with your studies.

KIND REGARDS
LUCIEN JAMES

Subject: Masters Research on St Helena 123 TSF

Good day,

My name is Nkazimulo and I am currently doing my Masters on the management of tailing storage facilities at the University of Cape Town and I decided to work on St Helena 123 for my research. I came across information from 2008 indicating that the TSF might be re-mined. However, I am struggling to find updates indicating whether or not that happened. However, since there are prospects of extending the TSF for a larger capacity among others, would this be for on-going operations or is it because it is being re-mined? Essentially, I would like to know if the prospects of it being re-mined actually took place.

warm regards,

Nkazimulo
