		EIA REVIEW ENGAGEMENT RECORD	
<i>EIMS Ref</i>	1570	<i>Project Name</i>	BLOCK 3B/4B EXPLORATION EIA

INTRODUCTION

This is a record of proceedings, comments, and responses of the Open Day Sessions held along the West Coast between 22 and 27 January 2024.

This document highlights the overall plan for the public meetings which form part of the public review of the Environmental Impact Assessment Report (EIAR) drafted for the Block 3B/4B Exploration Project. This report details the timeline of the Public Participation Process (PPP) in question, as well as the specifics of the format of the sessions.

RATIONALE

It has been deliberated that a different format is to be implemented for the EIAR public engagement opportunities. Given that I&APs would now have had an opportunity to engage with the background and key information about the project, the planned engagements will focus on providing new information to I&APs. In this regard, public meetings were more focused on presenting different specialist findings related to the considerations made following the concerns previously raised by I&APs during the Scoping phase of the project.

PROCEEDINGS

Meeting Format – Open Day Sessions

Public engagement in this phase of the project took place in the form of Open Day Sessions. Open Day Sessions covered 4-hour timeslots at each venue. Each session was held in a large hall to accommodate for the various planned activities associated with the Open Day Sessions. I&APs were able to attend sessions at any time that suits them during the 4-hour timeslot. Walkthrough or guided tours were conducted during the sessions.

Open Day Sessions differ from public meetings in the sense that they do not include any formal presentation. It was anticipated that many of the attendees would have already engaged with the material of the previous public engagements. Further, by excluding a formal presentation, more time was allocated to allowing I&APs to engage with the project through specialist viewpoints and key areas, essentially allowing for a finer evaluation of the project without repetition or reiteration of information.

For this reason, formal meeting minutes would therefore not suffice as a record for these sessions. Instead, this record acts to provide an overview of the meeting format as well as present the key information in terms of comments and responses which inspired during the Open Day Session. In this regard, the annexure of this Public Meeting Record includes an overview of all comments received at the respective sessions.

Notification and prior on-the-ground engagement

Prior to Open Day Sessions, the various communities were engaged through on-the-ground notification. Abalobi Express was commissioned to notify communities through field assistants and poster placement. Further, Abalobi Express also aided in providing some communities with transport arrangements to facilitate attendance. These initiatives were similar to those conducted as part of the Grassroots Communication Framework Initiative. However, the scale of these initiatives were smaller for the purposes of providing communities early notification.

Specialist Stations and focus discussions

Open Day Sessions were structured to allow for focused engagements. These engagements were conducted at dedicated specialist stations set up at the different venues. The stations and their focused content were defined by feedback and comments gathered during the Scoping phase of the project. Engagements at the various station took a form very similar to Focus Group Discussions. In this regard, participants gathered at the station and engaged directly with the relevant specialists or facilitators. All Open Day Sessions included the following stations:

		EIA REVIEW ENGAGEMENT RECORD	
<i>EIMS Ref</i>	1570	<i>Project Name</i>	BLOCK 3B/4B EXPLORATION EIA

1. Main/Introductory Station – Two separate stations at some venues (to facilitate dissemination in English and Afrikaans). Facilitated by representatives of EIMS.
2. Marine Ecology and Fisheries – Facilitated by representatives of Capricorn Marine Environmental.
3. Social and Cultural Heritage – Facilitated by representatives of Equispectives Research and Consulting Services as well as Nelson Mandela University.

Schedule of Open Day Sessions

An overview of the different Open Day Sessions held in the various towns across the West Coast is provided below. Altogether, 11 sessions were held in each of the already engaged towns or communities. Timeslots differed between towns, with some sessions being held in the morning (e.g., between 08:00 and 12:00), and some being held in the afternoon (e.g., between 15:00 and 19:00).

Town	Venue	Time and Date
Port Nolloth	Drop Inn Centre, Oven Street	Monday, 22 January 2024, 08:00-12:00
Hondeklip Bay	Eric Baker Hall	Monday, 22 January 2024, 15:00-19:00
Doringbaai	Miriam Owies Community Hall, Hawe Road	Tuesday, 23 January 2024, 10:00-14:00
Ebenhaeser	Ebenhaeser Community Hall	Tuesday, 23 January 2024, 15:00-19:00
Lamberts Bay	Lamberts Bay Hotel, 72 Voortrekker Street	Wednesday, 24 January 2024, 09:00-13:00
Elands Bay	Elands Bay Hotel, 1 Hunter Street	Wednesday, 24 January 2024, 15:00-19:00
St. Helena Bay	Sandy Point Hall, 2 Albatros Street	Thursday, 25 January 2024, 09:00-13:00
Saldanha Bay	Hoedjies Bay Hotel Conference Hall, Main Road	Thursday, 25 January 2024, 15:00-19:00
Yzerfontein	Yzerfontein Community Hall, 25 Dolfyn Street	Friday, 26 January 2024, 08:00-12:00
Cape Town	Hellenic Club, 24 Bay Road, Sea Point	Friday, 26 January 2024, 15:00-19:00
Hout Bay	Hangberg Sports and Recreation Centre, Karbonkel Road	Saturday, 27 January 2024, 08:00-12:00

SOURCES OF COMMENTS AND DATA

Comments were gathered during Open Day Session from the following sources:

1. Voice recordings

Voice recordings were captured during the engagements at the different stations. A main recording was taken at the introductory station. These recordings were transcribed with comments, questions, and responses exacted. Note, recordings were transcribed in the language that they were captured in.

EIA REVIEW ENGAGEMENT RECORD

<i>EIMS Ref</i>	1570	<i>Project Name</i>	BLOCK 3B/4B EXPLORATION EIA
-----------------	------	---------------------	-----------------------------

2. Open Flip-chart

An open flip-chart page was included at each specialist station for the capturing of key comments which were further discussed with other individuals who engaged with the project information. These were captured by the specialists who facilitated the Open Days.

3. Session booklets

In addition to the recordings and open flip-charts, the facilitators and specialists present at the various meetings captured comments they received at their respective stations. These comments were recorded in dedicated booklets which were subsequently compiled together to create records of the various communications.

VIRTUAL PUBLIC MEETING

In addition to Open Day Sessions, an online virtual meeting was set up to facilitate engagement with those who would not otherwise be able to attend the Open Days. This was also to facilitate engagements with key stakeholders as Open Day Sessions would have engaged communities generally. This meeting was held as a meeting and minutes thereof are included in the annexure of this record.

Cameron Cloete	Is daar mense wat die projek teenstaan en hoe voel mense oor die projek? EK voel dit is goed om ontwikkeling in klein dorpe te bevoordeel as projekte soos die begin sukses behaal.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat daar wel teenkanting kom veral van die NRO's af maar dat dit waardevolle terugvoer lewer maar dat daar mense is wat ook wel vir dit is.</p>
Unnamed participant	Ek het nog nie die dokument deur gegaan nie maar al wat julle mense belowe is werkseleenthede en die skoolkinders kry skryfbehoeftes en klere en so aan en dan stap die mense weg met miljoene, wat is die eintlike voordeel aan ons mense wat altyd die kort kant trek? Wat kan julle vir ons gee om te se dat die goed nie ons mense negatief gaan beïnvloed nie want die diep water is waar die groot vissers kepe vang. Ek stel nie belang in geld nie, ek gee om oor die nageslagte en die kos wat ons uit die see uit kry.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat al die impakte nie waarborg is nie en kan anders voorkom as wat voorspel is. Mnr Kriel verduidelik dat dit is hoekom al die maatreëls in plek is om te voorsien vir as ongelukke gebeur dat daar wel terugval meganismes is en dat daar baie groot kostes geheg is aan al die maatreëls en die toepassing daarvan. Mnr Kriel vertel ook van die meganismes wat in plek is om te verseker dat as mense eise het weens die projek is daar versekering inplak om te voorsien vir die eise wat kan kom. Mnr Kriel verduidelik ook die maatreëls vir rehabilitasie wat in plek is en in plek gestel gaan word.</p>

Unnamed participant	Wat gaan gebeur as hulle olie of iets kry in daardie boorgate? Sal daar ander mense kom wat die produksie verder gaan vat?	<p>GP Kriel</p> <p>Mnr Kriel verduidelik die proses wat gevolg word indien olie gevind is in daardie boorgat en wat die operateur sal doen indien dit wel die geval is. Mnr Kriel verduidelik dat daar baie prosesse sal moet plaasvind en dat mens nie sal kan voorspel wat gaan gebeur in daardie tyd nie maar dat baie prosesse sal moet plaasvind voordat die projek sal kan voortgaan as die produksie fase bereik word.</p>
Justin Montzingi	Voordat die eksplorاسie begin het ons mense enige se in die projek as gemeenskap? Ons is baie bekommerd oor die impakte wat moontlik kan gebeur want dit is wat ons mense kan affekteer.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik die proses van kommentaar lewer en verduidelik dat die kommentaar deel gaan vorm van die verslag wat aan die departement gegee is vir goedkeuring. Mnr Kriel verduidelik ook die kennisgewings proses asook dat mens ook kan appelleer.</p>

Dee Moyses	<p>PP Process was better than before – more interactive but still very complex for everyone to understand.</p> <p>Additional concerns: relation of the project to the green hydrogen developments of Boegoebaai.</p>	<p>Comment noted and I&AP thanked for compliment.</p> <p>The project does not have anything to do with the developments of Port Nolloth and Boegoebaai as ports in terms of green hydrogen. This has not been considered as activities will not directly affect Port Nolloth as a port.</p>
Sandy Neruvhola	<p>Well blow-out question on the integrity of the blow-out preventer.</p> <p>Further question on the safety of the people on the rig and those who may need to do underwater work.</p> <p>Question relating to the availability of isiXhosa material.</p>	<p>The mechanics of the preventer were explained. The preventer involves advanced technology and has been used in the past.</p> <p>Rig will not require personnel to go underwater at the depths related to the drilling itself. Much of the systems in place are automatic, with technological equipment on the rig to ensure the safety of those on board.</p> <p>I&AP was provided with relevant material in isiXhosa as requested.</p>

Pieter Afrikaner	As ek vertrouwd is met die inligting rakende die projek kan ek aan beweeg na byvoorbeeld Ilse toe?	<p>Nico Besuidenhout</p> <p>Mnr Besuidenhout het die prosedure van die vergadering verduidelik en het aangedui dat besoekers met enige van die spesialiste kan gesels rakende die spesifieke aspekte van die impak studie en dat as die besoekers net rakende sekere aspekte vrae het kan hulle beweeg na die relevante spesialis stasie en parallelle vergadering wel kan plaasvind gedurende die proses.</p>
Gert Afrikaner	Ek is bekommerd rakende geleenthede wat geskep kan word deur hierdie projek en wil vra dat sou enige geleenthede geskep word deur die projek dat die mense van Doringbaai prioritiseer word as die ontvangers van die geleenthede.	<p>Nico Besuidenhout</p> <p>Mnr Besuidenhout verduidelik dat ekonomiese, sosiale en kulturele impak studies gedoen is en dat sou Mnr Afrikaner belangstel dat hy met die relevant spesialiste te gesels om meer inligting te ontvang en om ook na die samestellings te kyk waar die inligting van die studies getoon word.</p>

Mathèw Swartz	Die mense van Doringbaai moet ingelig en geklem word gedurende die publieke deelname proses en Is die besonderhede rakende diere publieke deelname beskikbaar sou iemand dit wil sien?	<p>GP Kriel</p> <p>Mnr Kriel verduidelik die natuur van die publieke deelname prosesse van die omgewingsmagtigings proses en die publieke deelname wat daarby saam gaan. Dier vereistes van die publieke deelname is verduidelik en klem is geplaas dat die proses vrywillig is en dat niemand gedwing kan word om deel te neem aan die proses nie. Al die inligting van die omgewings impak studies is opgesom in nie-tegniese opsommings sodat die details beskikbaar is sodat belangstellendes goeie begryp het van die projek details.</p>
Debora de Wee	Daar is genoem dat daar min direkte finansiële impak gaan wees op die inwoners en die wat van die see af lewe in die gemeenskap . Ek is dankbaar dat dit eerlik gestel word dat negatiewe impakte bestaan. Watter skade sal daar wees rakende die see lewe wanneer die projek voortbeweeg na produksie toe?	<p>GP Kriel</p> <p>Mnr Kriel het verduidelik dat op die stadium waar die eksplorasiereg die huidige fokus is en dat produksiefase impakte nie tans beskikbaar is nie weens die feit dat dit 'n aparte omgewingsimpakstudie is wat na die afsluiting van die eksplorasiereg projek eers sal plaasvind as dit wel sou voortbeweeg na produksie toe. In die impakstudie van die produksie reg sal die sosiale en werksplan beskikbaar gemaak word. Mnr Kriel verduidelik verder dat modelle saamgestel is deur seisoenale data oor 20 jaar te bestudeer en dat as 'n barsting sou plaasvind sou dit nie by die kuslyn bykom nie en dat die "Oil Response Unit" beskikbaar sal wees ook.</p>

I&AP Name	Comment	Response
Alicia Dam	Wat gebeur met boorgate indien daar nie olie of gas gevind word nie?	<p>GP Kriel</p> <p>Verduidelik dat daar streng maatreëls is wat druktoetse wat gebruik word om die boorgate te seel in die rots wat dalk sterker as die oorspronklike rots sal wees.</p> <p>Collin Kinley</p> <p>Mnr Kinley het verder uitgebrei oor die spesifieke stappe met die verskeie vlakke van proppe wat in die boorgat geplaas word indien dit geseël word. As daar wel gas of olie is sal daar 'n put kop geplaas word met maatreëls in plek om te verseker dat skip veiligheid en natuurlewe veiligheid te verseker. Mnr Kinley het ook genoem dat die boorgate 250km van die kus af geboor gaan word in relatiewe diep water.</p>
Alicia Dam	Soos ek verstaan gaan die vis as iemand op die gebied waar ons vissermanne visvang kom gaan die vis beweeg na ander plekke toe.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat daar net een boor skip gaan wees en dat die boor skip 'n 500m veiligheids radius om hom geplaas gaan hé. Visserye wat gaan werk in die net area sal net tydelike versteuring hê en dit sal minimaal wees.</p> <p>Chris Heineken</p> <p>Mnr Heineken verduidelik dat geen visserye be impak gaan word deur die boor fase van di9e projek nie en dat stof die grootste versteuring gaan wees. Verder is die direkte steuring op die vis aan die kuslyn minimaal maar indirekte impakte kan op kreef larwe, snoek eiers en plankton wees maar dit sal minimaal wees weens die klein invloed van die boor aktiwiteite.</p>

Rentia Mattheus	Om die omgewingsimpakstudies gedoen word beteken dit mos dat daar iets is om te ontgin, so hoekom kan die sosiaal en werksplan nie beskikbaar gestel word nie want daar is mos iets om te ontgin want dit is hoekom die impak studie gedoen word.	<p>GP Kriel</p> <p>Die eksplorاسie word gedoen omdat die geologie en vorme in die see in die orange basin voorstel dat olie en gas daar kan voorkom en die eksplorاسie is om te sien of dit wel die geval is. Mnr Kriel verduidelik verder dat die impakte wat geïdentifiseer het op 'n skaal geplaas is en dat meeste van die impakte van die projek is geïdentifiseer as lae sensitiwiteit impakte wat bestuur kan word en dat daar min tot niks hoe sensitiwiteit impakte teenwoordig hierdie projek.</p> <p>Dr Ilse Aucamp</p> <p>Me. Aucamp verduidelik dat die studie impak studie in elke fase van die projek gedoen moet word en dat sosiaal en werkplanne opgestel moet word vir langtermyn projekte soos produksie en nie vir kort termyn eksplorاسie nie.</p> <p>Collin Kinley</p> <p>Mnr Kinley het verduidelik dat die projek mik om te kyk of daar olie is en dat hulle nie sekere kan wees dat daar olie sal wees nie maar dat die kans daar is dat olie daar kan bestaan. Mnr Kinley brei ook uit dat olie skepe baie meer besoedelings potensiaal het as die eksplorاسie boor projek.</p>
Josephine Bantham	Wie is die mense in die gemeenskap wat betrek is in Doringbaai wat as verteenwoordigers optree om inligting aan die mense in Doringbaai te gee in verband met die projek.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat Pedro Garcia kontakte het langs die hele weskus op wat namens die projekspan die bewusmaking gehandhaaf het om mense van die verskeie gemeenskappe in te lig van die projek en die inligting is sover moontlik te versprei. Mnr Kriel het ook aangedui dat die verteenwoordigers wat deur Pedro aangestel is onbekend is aan die span maar dat die mense wil betaal is vir hul dienste.</p>

EIMS Ref	1570	Venue	Doringbaai, Miriam Owies Community Hall, Hawe Road	Date and Time	23/01/2024, 10:00-14:00

Unnamed participant	Ons wil net vra dat as die aanstelling van Pedro gedoen word moet daar terme gestel word dat Pedro die geleentheid oop moet maak vir die mense wat die inligting versprei.	<p>GP Kriel</p> <p>Mnr kriel verduidelik dat Pedro as privaat maatskappy aangestel is en dat daar dalk onkunde was in die proses maar dat Pedro die beste man vir die aktiwiteite beskou was en dus is aangestel in daardie kapasiteit en dat publieke tender prosesse nie nodig is nie. Verder is dit vertel dat Pedro aangedui het dat die proses nie oop genoeg is nie en dat sy metode die kennis oor die projek verder laat strek het.</p>
Unnamed participant	Soos op die land is daar in die see ook sensitiewe ekosisteme wat bestaan met spesifieke diere wat in hulle voorkom en dieper in die see verander die lewe en plante en diere. Wie gaan verseker dat gedurende die proses dat die diere in daardie area nie geaffekteer gaan word deur die klankgolwe wat deur die eksplorاسie aktiwiteite veroorsaak word.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat die impak assessering van die marine lewe baie deeglik uitgevoer is en verduidelik dat klanke gedurende die aktiwiteite baie kort afstand effekte gaan hê en dat die effekte van klank op see lewe relatief klein gaan wees soos bepaal deur marine ekologie kenners en dat verskeie maatreëls in plek gaan wees gedurende die projek om te verhoed dat see lewe seerkry asook dat 'n onafhanklike marine soogdier observeerder voltyds op die skip sal wees. Die planne wat deel vorm van die impak studie is ook gerig op maatreëls wat gevolg moet word om te verseker dat alles reëls gevolg word. Dit is ook verduidelik dat die oorspronklike area geleë was in sensitiewe areas wat verkleineer is sodat toelaag gemaak is dat riwwe en sensitiewe lewe beskerm word. Mnr Kriel het aangedui dat al die data met betrekking tot klank beskikbaar is in die omgewingsimpakstudies verslae</p> <p>Chris Heineken</p> <p>Mnr Heineken noem waar in die verslag die inligting rakende die klankopnames met betrekking tot die projek gevind kan word en die klassifikasie en risiko faktore wat see lewe kan affekteer. Mnr Heineken het</p>

		ook die voorsorg maatreëls verduidelik wat in plek is om diere soos walvis en dolfyne te beskerm teen die klankgolwe.
Unnamed participant	Hoekom hoor mens nie deur die proses van die gevare, gebaseer op insidente wat in die verlede gebeur het met olie en gas projekte nie en wat is die gevare wat geassosieer word meer die aktiwiteite in daardie opsig?	<p>Collin Kinley</p> <p>Mnr Kinley verduidelik waar die meeste insidente met betrekking tot olie in die see beland en verduidelik dat die olie een gas industrie fokus op die mees uiterse voorsorg om dit te vermy. Mnr Kinley verduidelik verder dat alle faktore in ag geneem is sou daar oliestorting gebeur in die proses en dat die olie stortings reaksie program in plek is ingeval daar 'n storting sou wees en dat die plan werk met die mees nuwe tegnologie beskikbaar om te verhoed dat stortings versprei, die tegnologie vir monitering is ook verduidelik dat dit outomaties kan funksioneer ingeval een van die boorgate lek, Mnr Kinley gaan verder aan om die oorblywende maatreëls en voorsiening te verduidelik wat sal funksioneer om te verhoed dat stortings versprei.</p>

Unnamed participant	Die dokument verwys na sekere plekke wat geraak gaan word maar baie is nie genoem nie soos Doringbaai, Honttekliplaai ens. Maar moet die mense van die gemeenskappe nie ook betrokke wees in die voordeel van de projek aangesien die olie aan die gemeenskap behoort. Dieselfde van die sosiale en werksplan, die mense weet glad nie hoe hulle gaan baat van hierdie projek nie.	Nico Bezuidenhout Gedeelte van die vraag is al beantwoord maar Ilse en haar span is die mense om daardie vrae tee beantwoord. Die samevatting bevat nie die inligting wat meneer oor vra nie maar dit is in die omgewingsmagtiging maar Ilse en die uitgebreide span kan hulp dien.
Unnamed participant	As 'n derde party wil ontwikkel moet die regering en gemeenskap betrokke wees in die proses, die kommer is dat die gemeenskappe nêrens genoem word nie	Dr Ilse Aucamp Die huidige vergadering is net oor die projek en die spesifieke gedeelte van die projek. Alle gemeenskappe is beskryf en dit is gestel dat die gemeenskappe eers gaan baat kry as die produksie voortgaan. Dr Aucamp verduidelik ook dat die gemeenskappe moet seker maak dat hulle hulself inlig tot die hoogste sodat hulle meer kan weet van die projek. Verder word dit weer verduidelik dat die sosiale en werksplan net deur produksie nodig sal wees en dat produksie nog nie aangevang word nie wan die sekerheid dat olie beskikbaar is sal eers moet bevestig word en dat indirekte voordele sal kom na die produksie begin.

Jacques Mattheus	Die gemeenskappe moet ingeskryf word as aandeelhouders vir bemagtiging as deel van hierdie projek en nie net dat hulle werkskepping gaan kry nie	<p>Dr Ilse Aucamp</p> <p>Dr Aucamp dui dat die proses moet as deel van die sosiale en werksplan opgestel moet word om te onderhandel wat die presiese details sal wees wat gevolg moet word deur die proses van ontwikkeling van die dokument wat wel eers sal plaasvind as die aansoek vir produksie gedoen word maar dat “benefit sharing” op daardie tyd onderhandel word.</p> <p>Tironenn Kauluma</p> <p>In Namibië is die sisteem ontwikkel om meeste werk vir die inheemse gemeenskap te gee maar om werk te deel maar dat mense opgelei word om die kundige werk te kan doen en dit sal moontlik ook toegepas word. Dit is verder verduidelik wat die beste metode is wat die maatskappy ontwikkel het om die opleiding te doen om inheemse mense te bemagtig deur werkskepping deur produksie. Verder is die voordele van die produksie in Namibiese dorpe ook verduidelik .</p>
Arnold Mattheus	As die maatskappy klaar toestemming het om te boor, moet die staat nie aanvoer dat die gemeenskap moet baat uit die projek uit nie? Ons is bekommerd dat die ontwikkelaar nie noem dat hulle sal hulpbronne beskikbaar maak om die gemeenskappe op te lei en vervoer kose ens. te dek nie sal die produksie voorgaan.	<p>Dr Ilse Aucamp</p> <p>Dr Aucamp verduidelik dat die wetgewing intree vir produksie fase dan maatreëls en in plek wees en dat sodra produksie begin moet daar ‘n sosiaal en werksplan opgestel moet word om die planne om die omgewing e bemagtig opgestel moet word. Dr Aucamp het voorgestel dat die gemeenskappe PASA kontak soda hulle kan opgelei word en dat daar samewerking is vir die ontwikkeling van vaardighede.</p>

Alicia Dam	Die see is deel van die kulturele gewoonte en die see word gesê dat dit behoort aan almal. Wat sal gebeur as die regering in ag geneem word, wat sal die gevolge wees as die projek se hulle het nie werk vir die mense van die gemeenskap nie. Aangesien die gemeenskap afhanklik is van die vissermanne, kan dit verseker word dat die vissermanne op die water kan bly en nog steeds kan aangaan met die mense voer.	<p>Dr Sharon Gabie</p> <p>Verduidelik dat groot maatskappye baie goed die kulturele aspekte van die inheemse gemeenskappe in ag te neem en dat wetgewing vereis dat internasionale maatskappy moet toestemming vra om aktiwiteite uit te oefen om projekte te begin. Dit sal verseker word dat indien enige skade aan spesies gedoen word weens die projek sal strukture in plek wees indien ongelukke gebeur sal daar versekering in plek wees</p> <p>Dr Ilse Aucamp</p> <p>Werkplanne bevat die details oor versekering en voorsorg vir die gemeenskappe sou hulle benadeel word deur die projek. Die sosiale en arbeids plan bevat niks voorsorg nie maar beskryf ekstra voordele aan die gemeenskappe.</p>
Gert Afrikaner	Vra dat die tradisionele leiers en moontlike nuwe wetgewing met betrekking tot regstelling in ag geneem word deur die projek span want dit kan groot invloed hê op die projek. Mnr Afrikaner hoop dat volhoubare verskil gemaak sal word gedurende die projek.	<p>Dr Ilse Aucamp</p> <p>Dr Aucamp verduidelik dat die aksie wat genoem is, is nie heel relevant gedurende die omgewingsmagtiging wat dans gedoen word nie maar dit kan verseker produksie aansoek beïnvloed wanneer daardie proses begin.</p>

Unnamed participant	Wat veroorsaak die olie lekker? Wat is die oorsaak van olie soos met die Deep Water Horizon?	<p>GP Kriel</p> <p>Mnr Kriel verduidelik wat moontlik olie lekke kan veroorsaak . Mnr Kriel verduidelik verder dat die Deep Water Horizon ‘n ander projek was wat onder hoe druk en temperatuur gewerk het end dat in die geval van die huidige projek is daar baie laer risiko en dat tegnologie baie verbeter het sedert Deep Water Horizon.</p>
Unnamed participant	Julle bring ‘n voorlegging aan die gemeenskap. As ons die boor prosesse laat voortgaan gaan ons ons eie erfenis wegneem. As ons kyk na die see lewe het die olie ‘n baie groot effek. As hulle besig is om te boor sal die vissermanne nie kan uitgaan nie. Ons kultuur erfenis soos vakansie oorde sal uitsterf en mense se kultuur sal wegval as gevolg van di ten die toerisme gaan ook uitsterf. Watse beloftes is daar aan die gemeenskap sou iets soos ‘n vulkanies ontploffing veroorsaak word as gevolg van die boor. Die papiere wat ons teken is mos nou om toestemming te gee van die gemeenskap om vir die regering e se die mense het die projek goed gekeur.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat die papiere wat geteken word slegs dien as register om teenwoordigheid te dui. Mnr Kriel verduidelik verder dat die projek net vir eksplorاسie is en dat indien daar ontploffings in die see is as gevolg van die projek sal; dit nie op die land gevoel word nie en dat die modellering dui dat sou iets fout gaan sal die olie wegstroom van die kus af sowel as dat daar baie veiligheidsmaatreëls in plek gestel is om te verhoed dat enige olie uitlating ver versprei. Mnr Kriel verwys ook na die visserye spesialis se kommentaar dat die veiligheidsone om die boor skip glad nie die aktiwiteit van die vissermanne sal affekteer nie en dat impakte op visse minimaal sal wees. Mnr Kriel verduidelik verder dat die boorgat klein is en word geseël met sement wat sterker kan wees as die oorspronklike gesteente. Mnr Kriel het ook verduidelik dat aardbewings nie so algemeen is in Suid-Afrika nie en dat daar min risiko is dat aardbewing veroorsaak kan word.</p>

Unnamed participant	I am interested in the impacts of the project on the livelihood of the fisherman and local fish stocks. A small change can be made and change peoples lives. Did you do a study regarding that?	<p>Dr Ilse Aucamp</p> <p>Dr Aucamp explains that all of these factors were considered and that existing issues were also present as well as governance. She further explains that the impacts on livelihoods were discussed including the insurance which must be taken out to ensure that should an unforeseen event happen there are structures in place to mitigate this. Dr Aucamp also explains that because oil is new to South Africa that they are using other examples to do the process right. Dr Aucamp does continue to say that should catch drop there will also be remuneration if it can be proven that it is directly related to the project. Dr Aucamp also explains that existing oil transport is also a risk relating to oil that is ongoing.</p>
John Selby	I&AP expressed interest in the drilling activities itself having worked in the mining industry.	<p>Collin Kinley and Lucien James</p> <p>Details on the specifics of the project were provided.</p>

Unnamed participant	Hoe kry mens die regte om eksplorاسie te doen?	<p>GP Kriel</p> <p>Mnr Kriel verduidelik die aansoekproses en die agtervolgende prosesse wat gevolg moet word.</p>
Unnamed participant	Almal vertel verskillende stories en dit verwar ons mense en ons mense is afhanklik van die see. Daar is foto's op groepe in St. Helena Baai waar visse en seelewe word wel geaffekteer. Ons handtekening op daardie papiere word so gevat na die departement toe en daar word gesê dat die mense instem. Mense moet deur werksinkels gaan om die projek te verstaan sodat mense weet wat aangaan. Die geluide van die sonar en boor gaan al die visse wegjaag en ons gaan biodiversiteit verloor.	<p>Nico Besuidenhout</p> <p>Mnr Besuidenhout verduidelik dat as die mense vooraf geleer kan word van die konsepte te doen met die tipe projekte maar dat die hulpbronne daarvoor nie noodwendig beskikbaar is nie maar dat die huidige proses wel verder gaan as wat nodig is.</p> <p>GP Kriel</p> <p>Mnr Kriel verwys na die visserye afdeling van die impakte en wys dat die navorsing gedoen is om te bepaal wat die impakte van die projek gaan wees. As hulle wil olie produseer gaan die proses baie meer in diepte gedoen moet word. Op hierdie stadium kan mens nie voorspel wat gaan gebeur nie aangesien daar nog nie geweet word of olie teenwoordig is nie.</p>

Unnamed participant	Dit is nodig dat een-tot-een vergaderings met die groot visserye gehou word omdat hulle in daardie area sekere spesies vang en dat almal kan vergader oor hierdie proses want die impak van die projek kan verhoed dat vis hulle normale patrone vermy en dan sal die maatskappye hulle opbrengs verloor. Hierdie publieke deelname proses is nie reg vir pelagiese visserye om kommentaar te lewer op hierdie projek en sy impakte nie.	<p>GP Kriel</p> <p>Mnr Kriel verduidelik dat die projek normaal nie effek op visserye sal hê nie en dat die visserye net tydelik 500m weg van die skip af moet bly en dat niks permanente migrasie roetes van seelewe langtermyn gaan verander nie en dat alles korttermyn is. Meneer Kriel verduidelik ook dat die ekonoom ook al die ekonomiese impakte bestudeer en kwantifiseer.</p>
Unnamed participant	Wat het in Mosselbaai (Mosgas) gebeur? Hierdie proses is net om 'n boks te merk en die goedkeuring is al klaar gegee, dit maak nie saak nie.	<p>GP Kriel</p> <p>Mnr Kriel verwys dat in die konteks van Mosselbaai was al die omgewings prosesse wat vandag gevolg word nie op daardie tyd in plek was nie end at die nuwe prosesse voorsien vir al die moontlikhede van impakte en die risiko wat daarmee gepaard gaan. Mnr Kriel verduidelik ook wat die omgewings proses behels.</p>

Unnamed participant	When they go to the workshops and there is no interference but that with the project there may be work that is coming and that work be handed out to those who attended meetings to gain knowledge and they consider their children to have jobs and that those who do not attend are afraid of what will happen to the creatures in the sea and he knows that there is oil from Hout Bay to Durban and the no incidents have been reported in these areas but that some are afra8id still.	Dr Ilse Aucamp Dr Aucamp explained that the EIA process is done independently from the company who is conducting the exploration and the meetings in this process are to inform the community of the project and to determine the community sentiments towards the project so that the authority can decide whether the project should go ahead. Dr Aucamp also refers the gentleman to Mr Heineken for specific information regarding fisheries. Dr Aucamp also advises that the representatives from the Oil company may be approached as they are present.
Unnamed participant	They hope that the project is a success in South Africa because there is big value in the project for South Africa and the generations if oil or gas is found.	Comment noted.

Unnamed participant	What will the oil company do in Hout Bay since there is a lot of companies here and a lot of money is being made and nothing is being pout back into the community/company.	Dr Ilse Aucamp Dr Aucamp clarifies that because this is still exploration no investment will happen but if production does proceed a social and labour plan is required by law and that investment will be pushed into the communities.
Unnamed participant	The project must not touch the places where our ancestors lay and that if they find those that they must stay away from them and than you for that.	Dr Sharon Gabie Ms Sharon explained that the ancestors are considered as intangible heritage because they cannot be physically viewed and clarified that the no-go areas refer to those where tangible heritage may be found.

Unnamed participant	What if the ship is damaged or hit by a storm or some similar event. What will then happen to animals like whales and things like that with regard to movement of debris and how that will affect the small-scale fisherman.	<p>Sarah Wilkinson</p> <p>Ms Sarah refers the question to Mr Collin Kinley.</p> <p>Collin Kinley</p> <p>Mr Kinley explains that the project will take place far from the shore and that all environmental studies have been done to establish the baseline environment and the currents were also studied to establish that if a spill occurs where it would move to. It is further explained that plans have been produced which contain all mitigation measures as well as the most up to date mitigation equipment and that an oil response plan will be present and includes all stakeholders as well as insurance companies. Mr Kinley further explains the additional measures in place and the extent of these measures in place to react should a spill occur.</p>
Unnamed participant	As a parent I am concerned that our youth are of concern, and will it be possible that the youth can learn about the project and be trained to assist in the project and develop skills and how to learn to work in these industries and that they do not want outsiders to come in and want the local youth to be given preference.	<p>Collin Kinley</p> <p>Mr Kinley explains that the exploration project will not offer much opportunity however should a discovery be made benefits will start to appear in 6 or 7 years if a discovery is made during the exploration process. Mr Kinley further states that the exploration phase will only have indirect impacts on the local community. Mr Kinley also states that should a discovery be made, and a platform is constructed then the opportunities for coming generations will be available and that South African law requires the use of maximum local labour.</p>

Unnamed participant	I worked in Chile at one point and have seen these things before and I understand it is far off the coast, but I know it can have effects all over the coast based on my experience. I understand that our kids will benefit from this. Thank you very much.	
Unnamed participant	Not a lot of the people from Hout Bay are present at the meeting and the feel the community of Hout Bay are against the project since they believe the project will kill the fish and that they are waiting for the project to start. The project must carry on because the project will benefit the youth, but he is sad that the rest of the community is not there to understand the implications of the project.	Colin Kinley Mr Kinley states that he wants to hear both the positive and the negative aspects and opinions and urges the community to speak if they want to speak.

Walter Steenkamp	Die see is lewendig en die vissers gebruik dit vir alles. Hierdie hele proses is baie deurmekaar – hy wil weet wie het wat, wie doen wat, wie soek wat en wie kry wat? Port Nolloth was altyd 'n invoer/uitvoer dorp. Mense het goeie werk gehad en kon vir hulle gesinne sorg. Toe het dit in 'n vissersdorp verander, en daar was liefde en vrede. Elke huisgesin het werk gehad.	Ons weet dat die proses verwarrend is, en dat die vissers voel hulle bestaan word bedreig. Een van die redes waarom daar 'n EIA proses is, is om seker te maak almal se bekommernisse word in ag geneem. Ongelukkig is daar meer as een EIA proses aan die gang, en verskillende aansoekers en konsultante is betrokke. Verduidelik aan Walter waar hierdie spesifieke proses in pas.
Gert Jantjies en Vincent Young	Die regering moet meer planne maak om werk te skep. Dwelms is 'n groot probleem in die area. Tik is “evil” en die regering moet dit uitroei. Die besluitnemers ken nie die see nie, en sit in hulle kantore en neem besluite. Plaaslike mense moet voordeel kry uit die projekte, want die vissers is besig om uit te sterf.	Ons stem saam dat dwelms 'n groot probleem is, en dat dit op 'n hoër vlak aangespreek moet word. Die besluitnemers moet na ons verslae kyk, en daarom is dit belangrik dat mense aan die proses deelneem, sodat hulle bekommenisse in die verslae opgeteken word en aangespreek kan word. In hierdie fase van die projek (eksplorasie) is daar nie eintlik voordele vir die plaaslike gemeenskappe nie. Indien die eksplorasie suksesvol is, sal daar vir ontginnings regte aansoek gedoen word. In daardie fase word daar voorsiening gemaak vir gemeenskapsvoordele wat vaardigheids ontwikkeling insluit.

Groep deelnemers in gesprek met aansoeker	Aansoeker verduidelik dat daar sowat 43 gate in die laaste 30 jaar aan die Weskus geboor is, en een uit drie gate het olie. Die groep wil weet of daar enige beleggings in Port Nolloth gaan wees? Hulle voel die aansoeker moet belê in Port Nolloth voordat hulle eksplorاسie begin. Poer Nolloth bestaan uit bykans vier verskillende gemeenskappe, nie net die vissers nie.	Die aansoeker verduidelik dat daar sekondêre voordele is in hierdie fase, soos ondersteuningsdienste, verblyf en dies meer. Indien die eksplorاسie suksesvol is, sal daar vir ontginnings regte aansoek gedoen word. In daardie fase word daar voorsiening gemaak vir gemeenskapsvoordele wat vaardigheids ontwikkeling insluit.
Walter Steenkamp	Die diamant berdryf het mense verarm. Olie en gas gaan net verwoesting saai. Hy is nie teen vooruitgang nie, maar dit moenie ten koste van enige iemand wees nie. Dit voel soos 'n oorlog teen die vissers.	Ons neem kennis van sy verse en verstaan dat die bestaan van die vissers uit talle oorde bedreig word. Juis daarom is dit belangrik om die bekommernisse van die vissers in die verslae in te sluit.

Groep	Die regering praat van “Just Transition”. Daar is baie grond in die Noord Kaap beskikbaar vir sonkrag. Waarom word dit nie gebruik nie?	Die aansoeker verduidelik dat olie ‘n natuurlike hulpbron is soos wat vis ‘n natuurlike hulpbron is. Die olie maatskappye belê ook in hernubare energie, en sien die olie en gas, veral gas, as ‘n oorgangs bron van energie, en nie ‘n finale oplossing nie. Die aansoeker verduidelik verder dat hulle 5000m diep vir olie boor, end at die water tussen 500 en 2500m diep is.

Neville (Green Connection) addressing group	What are we doing with the comments. They never get feedback. They are not considered in the decision-making process. They feel that they give input, but nothing happens with the input. We need to move away from fossil fuels. How do they seal the wells? What about the Just Transition? It is disrespectful to do any exploration. They don't agree with the government and have no trust in the government. Why does the government representatives do not come to these meetings? The fact that many people participate does not mean that good decisions are made. The culture of the area are sold out. It is all about the money – not about the needy, but about the greedy. There are no balanced perspective – people are the guardians of nature.	The comments are recorded and captured in the issues and response report. The comments are included in the report that is submitted to the authorities. As environmental practitioners we do not have decision-making powers, but we do make recommendations to the authorities. We agree that South Africa should move away from fossil fuels, but this cannot happen overnight and oil and gas is seen as part of the Just Transition strategy with the ultimate goal of moving away from fossil fuels entirely. The applicant follows the processes prescribed by the government in the relevant legislation. We cannot answer questions on behalf of government, as we do not have the authority to do so. We do include all the comments to ensure that it reach government via the report.
Groep	Dis nie die man op die straat wat voordeel trek uit die projekte nie, die oorseese mense trek voordeel. Die gemeenskap wil insette in die projekte hê – dit moet 'n lang termyn positiewe impak wees. Die aansoeke gaan kumulatief lei tot die verlies van die Namakwalandse kultuur.	Indien die eksplorاسie suksesvol is, sal daar vir ontginnings regte aansoek gedoen word. In daardie fase word daar voorsiening gemaak vir gemeenskapsvoordele wat vaardigheidsontwikkeling insluit.

Groep deelnemers (informele bespreking waaraan verskeie mense deelgeneem het).	As daar enige geleenthede is moet dit regverdig verdeel word. Wat is die voordele vir die gemeenskap? Die mens kan nie in beheer van die natuur wees nie. Net die besighede kry geleenthede, nie die vissers of landelike gemeenskappe nie. Die mense wat ge-impakkeer word is nie die mense wat die geleenthede kry nie. Wat gaan gebeur na die eksplorاسie, die vissers het nie olie en gas vaardighede nie.	<p>Indien die eksplorاسie suksesvol is, sal daar vir ontginnings regte aansoek gedoen word. In daardie fase word daar voorsiening gemaak vir gemeenskapsvoordele wat vaardigheids ontwikkeling insluit. Op hierdie stadium is daar geen direkte voordele vir gemeenskapslede nie. Die eksplorاسie moet gedoen word om te bevestig dat daar olie en gas is, die aansoeker weet nie beslis dat daar is nie.</p> <p>Elke fase van die die olie en gas ontdekking en ontginningsproses vereis 'n omgewings impak studie spesifiek van toepassing op daardie fase. Dit is hoe die wette (MPRDA en NEMA) geskryf is. Dit is dus 'n lang proses wat verwarrend kan wees.</p>
Groep	Die gemeenskappe vereis dat "Social and Labour Plans "(SLP) nou al gedoen moet word. Daar moet 'n span in die gemeenskap wees wat saam met die olie en gas prosesse beweeg. As daar voordele is, soos bv Pedro Garcia se spanne moet daar terme en voorwaardes wees wat verseker almal kry die geleentheid om voordeel te trek uit die prosesse.	Indien die eksplorاسie suksesvol is, sal daar vir ontginnings regte aansoek gedoen word. Eers dan kan iets soorgelyk aan 'n SLP gedoen word, aangesien die aansoeker nog net geld bestee, maar niks inkomste genereer nie. As daar nie olie en gas ontdek word nie, en daar begin te vroeg met SLPs gaan die gemeenskappe teleurgestel word, aangesien die planne dan nie volhoubaar is nie. In die ontginnings/produksie fase word daar voorsiening gemaak vir gemeenskapsvoordele wat vaardigheids ontwikkeling insluit. Gemeenskappe het ook die plig om hulself te organiseer om te verseker deelname en voordele word vanuit die beste posisie vir die gemeenskap gedoen.

Group	<p>What about the impact on future generations? The communities have no trust in government. Government makes decisions on behalf of the communities with which the communities do not agree. The community wants benefit sharing and they want to know how people will benefit from these processes and developments.</p>	<p>At this stage there are no direct benefits for communities. The environmental assessment practitioners do not have decision-making rights, but can only recommend certain things. The government remains the final decision maker, as per the laws of the country. It is too early in the process to discuss benefit sharing – the resources must be determined first. The communities have the responsibility to educate themselves about how the oil and gas industry can benefit communities. Various parties such as PASA, oil and gas companies, the government and the private sector can assist with these education processes, but the communities also have responsibilities.</p>
Group	<p>Dis ons see en ons hulpbronne. Daar moet 'n voorgestelde plan wees om seker te maak ons weet wat is ons regte, en dat ons regte beskerm word. Die regering trek al klaar voordeel uit alles. Die gemeenskappe sien hulself as aandeelhouers. Die regering sê dat dit gemeenskappe wil bemagtig - hulle wil aandeelhouers wees, en nie net werk kry nie. Die regering het gesteel van die mense. Gemeenskappe wil geld van die regering kry om te reis na ander plekke waar daar olie en gas ontgin word sodat hulle van daardie gemeenskappe en lande kan leer.</p> <p>Die vis bedryf is hulle lewe, en hulle wil nie daarvan ontnem word nie. Baie jong mense het nie werk nie.</p>	<p>Die gemeenskappe moet hulself opvoed oor hulle regte sodat hulle hul regte kan beskerm. Dit beteken hulle moet deelneem aan verskillende prosesse en aksie neem vanuit hulle gemeenskappe. Dit is 'n goeie idee om by ander gemeenskappe wat in soortgelyke posisies is te leer. Die gemeenskappe moet die inisiatief neem en die regering of PASA nader. Dit is goed om al die alternatiewe tot hulle beskikking te ondersoek.</p>

Ernie de Klerk	Has the impact on human health been investigated? Oil and gas can lead to toxic pollution and pollution of drinking water. Where will the oil go?	I am not sure if the impact on human health has been investigated in this study, but it will definitely be included should production be considered. The toxic pollution question has been referred to the EAP. The oil will be used in South Africa, in all likelihood.
Tania	Has the potential impact on tourism been determined? Tourism is seen as a sustainable industry. The tourism industry is involved with the Paternoster People's project. What about the just transition? Most people are against oil and gas, although some are in favour of this type of development. Open days are a way of divide and conquer, and the locals have nothing to lose.	In the current phase of the project, exploration drilling, it is not deemed that there will be an impact on tourism, especially given the distance from shore that the proposed activities will take place. The just transition will take time, and oil and gas is seen as a transition energy and not a long term solution. The open day format was chosen because it gives people more opportunity to interact directly with the team. It gives people that do not have the confidence to stand up in a public meeting the opportunity to ask their questions in a less intimidating environment. In general, community members indicated that they prefer this less formal structure.

Edwina MacDonald	<p>Hoekom moet hulle in die see drill? Wat is die impak op die vissery bedryf? Wie gaan na die vissers kyk? Daar moet 'n ooreenkoms tussen die publiek en die olie maatskappye geteken word. Die regering gaan nie in die gemeenskap se belang optree nie. Hoe bepaal mens watter gemeenskappe gaan bevoordeel word?</p>	<p>Die visserye spesialis sal die vrae oor die impak op die seelewe beantwoord. Dis te vroeg in die proses om ooreenkomste te sluit, aangesien daar nog nie bepaal is of daar wel olie en gas is, en as daar is of dit die moeite werd is om dit uit te haal nie. Die omgewings konsultante kan nie namens die regering praat nie, ons kan slegs aanbevelings maak. Die impakte op die gemeenskappe sal uiteindelik bepaal watter gemeenskappe bevoordeel sal word.</p>
Jacqueline Kroes en Chris	<p>Wanneer het die EIA proses begin?</p> <p>Die regering jok vir mense.</p> <p>Die volgende generasies moet bevoordeel word. Die land het reeds vullis status. Die olie maatskappye moet versekering kry. As daar 'n impak is moet elke huishouding 'n toelaag van R3500 kry. 'n Databasis van al die vissers teen die kus af moet ontwikkel word</p>	<p>Die EIA proses het middel 2023 begin.</p> <p>Die verslag beveel aan dat die aansoekers versekering moet uitneem. As mense kan bewys die aansoekers is verantwoordelik vir enige impakte op iemand se bestaan, kan hulle vergoeding eis, soos in enige ander versekerings proses. 'n Algemene toelaag sal nie betaal word nie.</p> <p>Gedurende hierdie fase van die projek is dit nie prakties om 'n databasis van die vissers te ontwikkel nie, en dit val buite die omvang van die projek.</p>

EIMS Ref	1570	Venue	Yzerfontein Community Hall, Yzerfontein	Date	2024/01/26, 08:00-12:00

I&AP Name	Comment	Response
Margaret Kok	Hulle gaan teen die proses appelleer as daar nie 'n databasis is nie. Die gemeenskap moet gebruik word om die databasis saam te stel. Daar was identiteits bedrog in Suid-Afrika – die San is die regte inheemse mense. Mense se identiteit is gekoppel aan die land.	'n Databasis is buite die omvang van die projek. Die sosio-kulturele en politieke omgewing in Suid Afrika is kompleks en moet op 'n ander platform aangespreek word.
Paul Cornelius	Diversiteit is misleidend. In Suid Afrika is daar setlaars, plakkers en inheemse mense. Die inheemse mense word nie deur die regering erken nie. As daar versekering is moet all verbruikers van die see ingesluit word (ook mense wat medisinale plante oes).	Die sosio-kulturele en politieke omgewing in Suid Afrika is kompleks en moet op 'n ander platform aangespreek word. Die verslag beveel aan dat die aansoekers versekering moet uitneem. As mense kan bewys die aansoekers is verantwoordelik vir enige impakte op iemand se bestaan, kan hulle vergoeding eis, soos in enige ander versekerings proses.

Josef Saal Gert Jantjies Vincent Young Jakobus Saal Richard De Wee Gert Saal Alfrando van Heever F. Joseph (Comments were shared as part of a focused discussion)	<p>Algemene vra word bespreek onder.</p> <p>Was van kleiner vis spesies (nie net dolfyne / walvisse nie)</p> <p>Geraas; hoe ver travel die klank / geraas?</p> <p>Swak snoek seisoen – baie olie / gas werk word in Namibië gedoen – is dit verwant?</p>	<p>Vra was algemeen gevra en nie tot n individu toegestaan nie.</p> <p>Dodelik impak op klein vis sal net 'n gevolg wees van hoor klank golwe en ook net as die vis in die nabyheid van die klankgolwe is (paar meter), na omtrent 100 m sal daar minimale impak wees anders as sturing.. In die geval gaan daar geen geraas van die aardseheid wees in die boor proses. Die minimale klank van die VSP neem toe oor n paar uur (minimum van 6 tot 8 seiner) met redelike tyd tussen in. Daarom as ons kyk dat die impak waarskynlik nie meer as n radius van 100 m van af die boor platform en die ligging meet as 240 km vanaf die val is daar omtrent geen kans vir n impak of klein vis lanks die kus.</p> <p>Die gewone geraas van die boor platform is minder as die van n gewone vis treiler of groot skip wat verby vaart. Die klank van n seismic uitlating verskil vir vis en walvisse. Vir vis waar die klank n moontlike impak kan he is dit n maksimum van omtrent 420 m. Vir walvisse wat baie laag sein golwe kan hoor is dit n maksimum van omtrent 27 kilometer. Op die afstand sal hoegenaamd geen fisies impakte sal he.</p> <p>Moeilik om met sekerheid te se. Daar is bespiegel dat daar n moontlike verband is tussen die Namibië se snoek bron en die van Suid Afrika maar dit is nie met sekerheid bepaal nie. Die snoek bron in Namibië trek ook baie ver noord van Lüderitz en ver noord van Walvisbaai.</p>

	Net 6 see dae swakste kreef seisoen ooit	Moeilik om dit te antwoord. Baie ander faktore wat rede hiervoor kan wees. Blykbaar swak lank die hele kus.
	Water temperature – impak op vis / kreef	Ja beslis dit kan!. Miskien verwant met aard verwarming en die jare van steenkool brand.
	Wat gaan die gov. vir vissermanne doen as al die vis weg is?	Ongelukkig kan ek nie n antwoord gee daar op.
	Hoekom gebruik ons nie hernubare energie nie?	Dink ons almal wil daai kant toe gaan maar nie moontlik in die kort termyn nie.
	As ons 100% seker is daar is nie negatiewe impakte nie, kan ons ontgin.	
	Sou die gemeenskap se nee; wat gaan die gov. maak?	Ongelukkig kan ek nie n antwoord gee daar op.

Members of the community - Fishermen		<p>The meeting did not entirely follow poster route with groups asking questions. Most of the questions were posed in a general forum that included questions on the impact on fisheries and environment. These were answered at the time and the proceeding was recorded.</p> <p>The questions below were posted by a few individuals in passing.</p>
	Word plaaslike statistieke in berekening gebring?	Kan antwoord hier op.
	Hoe verteenwoordigende is visvang rekord van DFFE	Vir die kommersiële sektore hoort dit akkuraat te wees want alle landings word opgeskryf.
	Is toegang tot veiligheidsone gewaarborg?	<p>Is nie seker of dit n praktiese vraag is. Die boor platform is omtrent 240 km van die val af. Dit het n 2 km veiligheidsone om die platform en alle bote sal gevra om veg te bly daar uit.</p> <p>Dit gaan net die tuna lang lyn bote beïnvloed en hulle gaan gevra om ten minste 10 km veg te bly weens die moontlike dryf van hulle lyn.</p>
	Watte kritiese bevindinge word uitgesluit?	Kan nie antwoord hier op.

		<p>The meeting did not entirely follow poster route with groups asking questions. Most of the questions were posed in a general forum that included questions on the impact on fisheries and environment. There were answered at the time and the proceeding was recorded.</p> <p>Few common questions asked be individuals are included.</p>
Patricio Frisley	Would like to be notified of outcome of the application	
	Wat se impakte sal dit he op die kleinskaal vissermanne?	<p>Nodige om die skaal van die boor operasie te verstaan.</p> <p>Die boor vind plaas omtrent 240 km van af die kuslyn in diepte van 2000 m tot 3000 m. Die direkte sturing van die boor gat op die see bed is nie veel meer as n 50 m radius van die boor.</p> <p>As sulks die impakte op vis na aan die kus is waarskynlik baie laag.</p>
	Wat is die gevaar van n olie lekkasie?	<p>Eerstens die kans van n lekkasie is laag. Die maatskappye wat boor moet enorme voorsorg materiale in plek he om n lekkasie te bekamp. Dit sluit in gereedskap op die grond wat die boor gat kan stop met sement. Die bly in posisie vanaf die begin van die boor prosesse. Die bote wat saam met die boor platform werk dra gereedskap om olie of the water te bekamp. Daar is ook n maatskappye in Saldanha wat reg staan om n groot lekkasie to bekamp.</p> <p>Modellering is gedoen op die effekte van n lekkasie en dit wys dat daar is min kans dat enige olie die kus sal bereik.</p>

Group	General questions asked by several small groups. Mostly in English	
	What impacts will this have on the small-scale fishermen.	<p>Necessary to understand the scale of drilling operation.</p> <p>The drilling takes place about 240 km from the coastline in depths from 2000 m to 3000 m. The direct impact of the drilling on the seabed is not much more than a 50 m radius from the drill.</p> <p>As such the impacts on fish close to shore are probably very low.</p>
	What is the duration of seismic activity	<p>There is no seismic activity. This is only a drilling operation.</p> <p>The only noise generating part of the operation is likely to occur during the Vertical Seismic Profiling (VSP) processes if this is required is necessary.</p> <p>This is a once-off" process that can entail six to eight soundings spread out over a maximum period of nine hours.</p>
	What is the impact on whales?	<p>The normal noise of the drilling platform is less than that of a normal fishing trawler or large ship sailing past.</p> <p>The impact of the VSP has been modelled in detailed in the report and is different for two main groups of cetaceans, smaller dolphins that communicate at high frequencies and larger (Baleen) whales that communicate on very low frequencies.</p> <p>However, in summary combining the two groups, no injury is likely to occur more than 200 m from the sound source and the maximum possible distance that whales are likely to detect or respond to the noise is 27.5 km.</p> <p>Also important to consider that the drill rig will have onboard both marine mammal observers (MMOs) and passive acoustic monitors (PAM), to provide 24 hr monitoring for the presence od any marine mammals in the vicinity. Should any marine mammal be detected within 500 m of the rig then any</p>

		operations (VSP) will be stopped immediately. There are detailed procedures laid out to accommodate these situations.
	What are the measures to mitigate against an oil spill	<p>Firstly, the chance of a leak is low. However, the companies that drill must put numerous measures in place to combat a leak. This includes equipment on the seabed that can plug the drill hole immediately with cement. It is remotely controlled and present through to drilling process.</p> <p>The tender boats are fully equipped, and crew are trained to curb an oil spill on the surface. There is also a company in Saldanha that has the equipment to further curb the effects of an oil spill.</p> <p>Modelling has been done on the effects of a leak and it shows that there is little chance that any oil will reach the coast.</p>

Groep	Algemene vra word bespreek onder.	
	Was se impakte sal dit he op die vis eiers en lavas	<p>Al moontlike dodelik impak op vis eiers, lavas, of klein vis sal net 'n gevolg wees van hoor klank golwe en ook net as die vis in die nabyheid van die klankgolwe (20 m) is. Na, omtrent 40 m sal daar geen impak wees.</p> <p>Die gevaar sal ook net bestaan vir VSP prosesse as dit nodig is. Die neem toe net een keer oor die tyd wat geboor word vir paar uur (minimum van 6 tot 8 seiner). Daarom, as ons kyk dat die impak waarskynlik nie meer as n radius van 20 m van af die boor platform en die ligging van die boor platform 240 km vanaf die kus, is daar bitter min kans van sturing aan vis eiers, lavas of klein vis.</p> <p>Ons moet ook onthou word dat die seisoen vir vis-kuit-skiet is oor November, Desember, en January, en die boor operasies is beplan vir die tweede helfte van die jaar wat die impakte gevaar nog minder maak.</p>
	Wat van dolfyne en walvisse	<p>Die normale geraas van die boor platform is minder as dié van 'n gewone vistreiler of groot skip wat verby vaar.</p> <p>Die impak van die VSP is in besonderhede in die verslag gemodelleer en verskil vir twee hoofgroepe walvisse, kleiner dolfyne wat teen hoë frekwensies kommunikeer en groter (Beleen) walvisse wat op baie lae frekwensies kommunikeer.</p> <p>Om egter die twee groepe te kombineer, is waarskynlik geen besering meer as 200 m van die klankbron af nie en die maksimum moontlike afstand wat walvisse waarskynlik sal opspoor of op die geraas sal reageer, is 27,5 km.</p> <p>Dit is ook belangrik om in ag te neem dat die boor tuig beide see soogdier waarnemers (MMO's) en passiewe akoestiese monitors (PAM) aan boord sal hê om 24 uur monitoring te verskaf vir die teenwoordigheid van enige seesoogdiere in die omgewing. Indien enige seesoogdiere binne 500 m van die tuig opgespoor word, sal enige bedrywighede (VSP) onmiddellik gestaak</p>

"Oom Apie" – Did not sign register	<p><i>Oom Apie was very emotional and started the conversation before any introductions could start. Oom Apie spoke a lot about other issues pertaining to all the issues in fisheries, hence difficult to capture all he spoke about which disrupted the whole system as it happened in Hondeklipbaai, taking a while for the Open day proceedings to start. Oom Apie, while speaking so loudly, also stopped people from signing the register.</i></p> <p>Hulle verslae word op n raamwerk gesit en dit sê nie 100% wat die mense sê nie. Die mense praat maar daar word nie geluister nie daar word nie geluister nie</p> <p>Their reports are placed on a framework, and it does not say 100% what the people say. The people speak but are not listened too, we are not listened too.</p>	Time was spent to speak to the I&AP. For the most part, the I&AP's concerns related to legacy problems rather than the project. As a long-time representative of the fishing community, his comments provided an understanding of current community sentiments around similar projects.
The following represents comments from representatives of The Green Connection who initiated discussions around the nature of the meeting and why it was necessary to not proceed with the process.	Comments mainly criticised the responses to previous comments and the initiatives taken to engage the public including the Grassroots Communication Framework.	Comments were recorded and I&APs were urged to contact EIMS should they wish to discuss details of the project. The meeting was also calmed down to allow for the continuation of the process.

Chief Charline Achilles	<p>Ons staan nou hier en luister, maar die government traak hulle nie, die mense praat nou dan gaan hulle na die government toe en sê die mense het ingestem</p> <p>Ek het dit laas ook gesê, julle kan nie hier kom na ons mense toe nie en dan hou julle meetings maar die government is nie hier nie</p> <p>Chief Sharlene was baie bekommerd oor die prosesse wat besig om te gebeur</p> <p>Sê dat sy dit aleeds genoem het toe sy saam met Pedro gewerk het dat die gemeenskap is onkundig omtrent die issues</p> <p>Sy sal dit weer sê - daar moet werkswinkels gehou word voordat hierdie type van ope dae / vergaderings na die gemeenskappe toe kom dat die mense kan verstaan</p> <p>Mense het fotos gestuur op ons WhatsApp groepe oor wat gebeur en dat die visse uitgespoel het nou laas en die see lewe word aangerak</p> <p>Hoekom word onse mense nie gebruik nie. Die vissermanne ken die see. Erny is our traditional specialist, and he is a fisherman. He has a holistic view of the ocean and gives us information from this point. Gebruik ons mense, indigenous knowledge versus book, specialist knowledge. Sluit ons manne in! Hulle ken die see. Hoekom word hulle nie ingesluit nie?</p> <p>We stand here now and listen, but the government doesn't care, the people speak now then they go to the government and say the people have agreed</p> <p>I also said it last time, you cannot come here to our people then you hold meetings but the government officials are not here</p> <p>Chief Sharlene was very concerned about the processes that were happening</p>	<p>I explained that we are doing the open days in the various communities to inform them about the outcome of the previous research that has been done in respect to the exploration process. That it is a feedback session, and we are using a different method of engagement through poster presentations. Chief Charline said she understands it, but the community does not understand the same way, hence the suggestion made a long time ago about workshops and the various groups (fishermen) working together with the experts/scientist to better the outcomes of the project.</p>

EIMS Ref	1570	Venue	Sandy Point Hall, St Helena Bay	Date	2024/01/25, 09:00-13:00
----------	------	-------	---------------------------------	------	-------------------------

I&AP Name	Comment	Response
	<p>Says that she already mentioned it when she worked with Pedro that the community is ignorant about the issues that is going on</p> <p>She will say it again - workshops must be held before these types of open days / meetings come to the communities so that the people can understand.</p> <p>People sent photos on the WhatsApp groups about what is happening and there were fish that washed up on the beach and the sea life is being affected, recently. Why are our people not being used? The fishermen know the sea. Erny is our traditional specialist, and he is a fisherman. He has a holistic view of the ocean and gives us information from this point. Use our people, indigenous knowledge versus book, specialist knowledge. Include our men! They know the sea. Why are they not included?</p>	
Francois (Surname not confirmed)	<p>He wanted to know who the South African partner is in the deal?</p> <p>If they are members of the ANC?</p> <p>Is the government involved?</p> <p>He noted that to speak about apartheid is nonsensical, thirty years into democracy</p> <p>People should get over the apartheid story already</p> <p>He wanted to know why are there only two groups, Khoisan/Xhosa on the poster?</p> <p>What about the other groups because they are also marginalised like the white people who were born after apartheid like himself</p> <p>Why should they pay for the mistakes of their forebears and when is it going to stop</p>	<p>On the issue of apartheid and why it is mentioned on the poster, many people who were displaced during apartheid and those who lost access to the sea and land can trace it back to a time before apartheid, and still speak of these stories. Our results and the findings that he sees on the poster are based on speaking with people living along the coast who tell us these stories of displacement during apartheid. Many coastal dwellers as possible that includes business owners and developers were engaged. Also touched on generational wealth and that many white people are still the beneficiaries of wealth that was accumulated by their forebears that people are still enjoying today. That it is necessary to bring apartheid into the discussion because what it tells us is that South Africans have not completely healed as a people from their losses.</p>

<p>Chief Liedeman</p> <p>Chief Liedeman followed the open day from the Sandy Point Hall, Saldanha to Yzerfontein.</p> <p>He lives in Yzerfontein. The organisation in the area is the Coloured Person's Communal Reserve Act of 1961.</p>	<p>Traditional Men's Parliament</p> <p>No aboriginal people on board</p> <p>The Chief identifies as a Nama-Hollander</p> <p>He identifies global warming as a problem for him – using a metaphor of rape, that we are raping mother earth with all the extraction processes that are happening</p> <p>Spiritual life versus natural life</p> <p>Says if the conversation is to start, that it must begin from 400 years ago</p> <p>The Chiefs says if we use a slingshot and pull our trigger to 100 years back we might hit the target</p> <p>It's all about paper, paper has no value (paper is the money that he refers to)</p> <p>There were many stages of seeking paper in South Africa</p> <p>The new gold is oil and gas</p> <p>If we see each other as the same, we can live together</p> <p>Opportunity, fisherman can live a better life</p> <p>The hell is burning in Europe (this is where he started making the drawing given to Lucien explaining this hell situation)</p> <p>We are in paradise, now they want to turn paradise into hell</p> <p>We can create fuel out of cannabis that is also very sustainable</p> <p>Law of the land not the same as the law of the sea. The law of the sea is where our people are qualified in the law of the sea. To get to paradise which is South Africa, they used the law of the sea, the beginning for us was when the invaders came</p> <p>We are our mother's children</p> <p>Our mothers were found in paradise and disrespected by those who came, both white and black people</p>	<p>The Chief was speaking a lot about the Khoe and San movement, the historical issues of the people and his concern about global warming. It was difficult to get the Chief to focus only on the topic of exploration and the different results that was found, which we are presenting at this open day. He was the only there, and I gave him the platform to speak because he was full and needed an outlet to share his thinking. The slingshot metaphor was interesting as it addressed the law of the land that that people are fighting for and the law of the sea represented the longstanding relationship South Africa has with Europe through the ocean and seafarer's and how these than impacted on the intangible heritage of the Khoe and San people</p>

Luce-Lynn Fondling	<p>Wie is verantwoordelik vir die see</p> <p>Gaan daar terug gegee word aan die gemeenskappe?</p> <p>Once you start drilling and you do not find something what will you give back to the community?</p> <p>Who is responsible for the ocean?</p>	<p>My response to Luce-Lynn, as noted on the poster that we should have a holistic view of the ocean that includes my actors, from divers to surfers and fisherman and those using the ocean for ritual purposes. The ocean is a space for everyone, although we note and have heard in our research that people attempt to barricade certain portions of the ocean making it a no-go zone for the public through charging fees for entrance. All the coastal people are responsible for the ocean and its upkeep</p>
Name not confirmed	<p>Studente weet baie keer nie wat om te studeer nie en die olie en gas platform is n nuwe studie rigting</p> <p>Students often do not know what to study and the oil and gas industry opens a new direction for study</p>	<p>I told her about the oil and gas internship through PASA and that students should choose the right subjects to be able to qualify for such opportunities</p>
Ephrahim Mukhari	<p>He praised the Chair and said it's so significant to South African people that someone brings in an issue such as intangible heritage in these very complicated issues of the ocean.</p>	<p>I&AP also provided a comment sheet which is also attached.</p>

Lyle (to GP)	<p>How will the drilling affect the fishermen?</p> <p>Social ills, look at helping the youth</p> <p>Lyle says the people in the community do not know about the meeting. He is waiting for his Chief. Reagan was there asking questions about jobs for drilling for the community (Reagan stood at a distance while speaking to Collin. Lyle busy phoning the Chief. Meeting attended by amaXhosa people. Lyle left, only one member from the Coloured community sat through the presentations)</p>	<p>I heard what Lyle said to GP, so I approached him and asked that he phone his Chief and other members to come and attend the meeting. They never came to the open day</p>
<p>Proceedings in this session were in Xhosa. Names were difficult to track because of language.</p> <p>On the issue of intangible heritage no one asked questions only commented</p>	<p>The community people are attending the while the fishermen are at sea</p> <p>Suggested that there must be a list to show who attended the meetings in order to get preference for work</p> <p>Bursaries for children</p> <p>What is the oil and gas company going to do for the community</p> <p>No old age home</p> <p>No facilities for the people in Hout Bay</p> <p>How will the people know if oil and gas are found?</p> <p>Awareness programs for the people</p> <p>The applicants must always be aware of the people's intangible cultural heritage at the ocean</p>	<p>Ilse responded if they find oil and gas then there must be more workshops to inform the community to draft the Social and Labour Plan, but for now it is important to note the process of application is in the exploration phase, meaning they will first drill and see if there is oil</p>

MEETING DETAILS

Meeting	1570 EIA Report Review Meeting		
Meeting Venue	Virtual Meeting	Date	2024/02/01
		Time	15:00-17:00
<p><i>A Public Meeting was scheduled with the Interested and Affected Parties (I&APs). The aim of the meeting was to provide feedback regarding the findings of the EIA Report. During the public meeting which took place between 15h00 and 17h00, a presentation of the project description, impact assessment, project team and project timeframes was delivered to all attendees of the meeting by Environmental Impact Management Services (EIMS) Pty (Ltd). A presentation was delivered by Mr GP Kriel from EIMS in English. After the presentation was delivered, a question and answer session was opened where attendees asked questions or expressed their comments regarding the project.</i></p>			

AGENDA

Item
1. EIMS Presentation <ul style="list-style-type: none"> a. Introducing the project team b. Project Description c. Legal Application Process d. Public Participation e. Receiving Environment f. Impact Assessment g. Environmental Impact Statement h. Specialis span/Specialist Team
2. Questions and Answers

MINUTES

Item No	Item
1.	EIMS Presentation
	As listed above, the meeting commenced with a presentation facilitated by Mr GP Kriel. After the presentation, the meeting was open to questions and comments from those who attended.
2.	Questions and Answers
	The following is a summary of the comments and questions which were recorded during the proceedings of the meeting.

MINUTES OF MEETING

EIMS Ref

1570

Project Name

BLOCK 3B/4B EXPLORATION EIA

Item No	Item
a.	<p>Monica Stassen</p> <p>Why did the oil spill response not consider the no-capping option?</p> <p>There are not enough recommendations for wildlife response plans and there are guidelines and standards which should be followed when a spill or something similar happens.</p> <p>Why are marine mammals and turtles not really mentioned in terms of oil spill modelling?</p> <p>It is important that SANCOB be included and liaise with in terms of oil response plans and that it should be noted that marine mammals and turtles should also be included in oil response plan during the ESIA process.</p> <p>GP Kriel</p> <p>MR Kriel explains that models were made from a worst case of 20days between spill start and capping. Mr Kriel appreciates the feedback on wildlife response plan.</p> <p>Dr Andrea Pulfrich</p> <p>Dr Pulfrich agrees that wildlife reaction plans should be included as part of the process and expresses gratitude for the comment.</p> <p>GP Kriel</p> <p>Mr Kriel clarifies that the oil spill response plan will be compiled before drilling but does not form part of the EIA phase.</p> <p>Dr Andrea Pulfrich</p> <p>Dr Pulfrich indicates that whales and turtles should be included in the oil spill response plan including mammals and not just birds and mentions all bodies which need to be liaised with.</p>
b.	<p>Jennifer Olbers</p> <p>Can you explain the difference oils and fuels which could be found because I think the impacts can be different and the oil spill model was done for more than one type of fuel.</p> <p>GP Kriel</p> <p>Mr Kriel defers to Mr Jan Meyer.</p> <p>Jan Meyer</p> <p>Mr Meyer explains the different fuels which may be found and why the specific models were done in the way that they were.</p>
c.	<p>Michele Rivarola</p> <p>Are there any actual benefits to this project since international organisations are pleading for oil companies to stop prospecting since this is causing so much damage to the planet? Oil companies are not the most ethical and are only in it for the money and the benefits to the country are infinitesimal compared to the risks and it seems that only well-connected people will really benefit from a project such as this.</p>

MINUTES OF MEETING

<i>EIMS Ref</i>	1570	<i>Project Name</i>	BLOCK 3B/4B EXPLORATION EIA
-----------------	------	---------------------	-----------------------------

Item No	Item
	<p>I do not understand how you can say that insurance is a way to compensate for loss since if you lose a whale or a penguin they cannot be bought back. It seems like animals are nothing when there are profits to be made.</p> <p>GP Kriel</p> <p>Mr Kriel notes that the comments are recognised and recorder and understands that there are other areas where complications have occurred and that the process was very specific and recommended the most advanced technology possible as well as all insurances required. Global warming was taken into account and that the current exploration was the focus and that during production is where the much bigger picture will be relevant and is out of the scope of the exploration phase.</p> <p>Collin Kinley</p> <p>Mr Kinley explains that he understands that there is more and more need to understand climate change and the symptoms thereof but that he seeks to find resources for4 countries which do not have them and explains that a sudden halt to explorations would be detrimental and that it would be better able to enable transition depending on the desires of stakeholders like government. Mr Kinley also explains that they are part of the transition and does not work against it but supports it.</p> <p>GP Kriel</p> <p>Mr Kriel also explains that the whole team are environmental scientists and that all factors are considered and explains that when determining impacts all possible factors were considered and that comments will be captured accurately.</p>

1570	Block 3B/4B Exploration Right EIA – Open Day Comment Sheet Record
Name I&AP	Comment
23 January 2024 John Swart Port Nolloth Drop Inn Centre	Ek John voel baie gelukkig met die bywonne van EIMS baie dankie.
25 January 2024 Anne Enslin St Helena Sandy Point	Bekommerd oor die vernietiging van seelewe.
25 January 2024 Bryan Williams St Helena Sandy Point	I don't want an oil Drilling Rig off the coast of South Africa.
25 January 2024 Pat Jarnine St Helena Sandy Point	Do not approve of exploitation of our seas and country. Australia can stay in their own country and stop paying African countries bribes to come and destroy our environment.
25 January 2024 Vicky S Vounnouli St Helena Sandy Point	We are one of the last outposts of unspoiled coastlines. Don't let spoil this area too!!

1570	Block 3B/4B Exploration Right EIA – Open Day Comment Sheet Record
Name I&AP	Comment
25 January 2024 Anne Todd St Helena Sandy Point	It was quite obvious at the public meeting that the community is TOTALLY against this project.
25 January 2024 Marna Williams. St Helena Sandy Point	To me it doesn't matter how much the project gets sugar coated, there will be negative consequences for our community and environment. I completely oppose any extraction of oil and gas off the coast of South Africa.
26 January 2024 Hleketani Ephron Mukhari SEA POINT Hellenic Club	Great transition from the first meeting an in-depth initiating beginning and coherent orderly flow through the information with illustrative strength. Good emphasis too the insurrection and contingency planning for the likely occurrences of the negative impacts. Staging info 3 phases with specialised representation which shares perspective with participants in depth knowledge sharing. Generally enthusiastic passionate representation of fishing industry concerns and those communities especially with regards to tangible and intangible heritage. Sharing in that this also stimulates geological discoveries as exploration is in procession.
24 January 2024 Zandile Xowa	I want to know if there can be oil in our ocean, the advantages and disadvantages of the project. How will be our community members benefit of this project. How long will this be happening in our community.
25 January 2024 Deon De Klerk St Helena Bay	An oil spill represent an immediate negative effects on human health including respiratory and reproduction problems. Oil spill causing future oil supply to decline also effects the everyday life of humans such as the potential closure beaches, parks, fisheries and firehazard. Spilled oil can also contaminate drinking water supplies. The kwatiti oil fires produced air pollution that cause respiratory distress (citation needed)

I&AP Name	Comment	Response
Neville van Rooy (Green Connection)	Questions were asked about previous consultations – why were comments of I&APs of previous meetings not addressed? Or rather, how do these comments contribute to the whole process and decision altogether	The competent authority makes these decisions. All such comments are captured as part of the final report. Responses to different comments are also included in the report.
Additional Observations	Members of the community and The Green Connection attempted to disrupt procedures by encouraging participants not to sign the register or participate in the Open Day.	Situation was calmed and community members were allowed the opportunity to participate in the proceedings.

Kommentaar / Comments:

Die woord ~~sosiaal~~ - Wat kry die
gemeenskap uit die proses uit?

Stuur dokumentasie wat Engels is
twee of drie gaen na Universiteit.

Gemeenskap wil oplossings hê.

Hulle is trots op wat hulle doen vir die
gemeenskap, maar dit is in druppel in die
emmer. = Ongelukkigheid

Jan moet hulle nie vir ons kom lieg nie. Praat
van SA regering

Waarom kom mense uit vir EIA as hulle weet
die government het klaar besluit.

Soek die regte mense! Gisteraand boodskap gekry.

- Leer die mense van Corporate Law. As ons nie
die regte taal het kan ons nie saam praat nie.
- As ons mekaar misverstaan kan ons nie oreg
saam praat nie
- Dinge wat tastbaar is op die sosiale vlak. Groepe
binne groepe.
- Watse impak het die groente tuin op die
gemeenskap. (NB)
- Die plan om nie groepie groepie te wees nie

↓
Die oorspronklike plan is om die wêreld net so te los.

- Respek vir ons 'Kom vandaan'. Groot respek vir Kultuur.
- Kon Sultasie Soos n 'koei se stert' dit staan van al kant
- Ioke vir spesifieke mense wat die belange van die gemeenskap op
HART HET

Lamberts Bay.

• Die kwalifiseerde Mense

• Maak onderskeiding tussen gas en olie in terme van kwalifikasies.

KHOE / SAN

KHOISAN

1928.

Kommentaar / Comments

Wat van kleiner vis spesies (nie net
dolfyne / walvisse nie?)

Geraas - hoe ver travel die klank / geraas

Swak snoek seisoen → baie olie / gas werk word
in Namibië gedoen → is dit verwant?

Net 6 see dae - swakste kreef seisoen ooit

Water temperature → impak op vis / kreef?

Wat gaan gov. vir vissermanne doen as al die
vis weg is?

Hoe kom nie hernubare energie nie?

As ons 100% seker is daar is nie
negatiewe impak nie, kan ons omtrein.

SOU DIE GEMEINSKAP SÊ NEE WAT.
GAAN GOV. MAAK.

Kommentaar / Comments

Oilspill / Everst - Weet ons wie is die vissers in elke dorp?

Bestuur van impakte.

Wat van geestelike impak?

Vissers is nie die mense wat werk kry nie

Wat van bevindings van COP? Hoekom kyk ons nie na renewables nie?

Mense baat nie daarby nie - nie sustainable nie? (2020)

Co-op het reeds hofsake gewen. Gemeenskaps verdeel - teen weet nie wat die ander doen nie.

Wil nie net mooi stories hoor nie - wat van die slegte kant?

Social responsibility nou swak - baie ontwikkeling groen waterstof / Boegobaai hawe. Gaan klomp inkommers wees

Gaan die gov. luister na wat die mense van P.N. sê? → min vissers.

Wat is die benefit vir gemeenskappe? Wins deling? Moet water hê - 2 waters → see + landbou water

Mense moet opgelei word. → skills development

Vra geura gebaseer op ervaring op die see. Word dit ook in og gemeen?

Paksaai gebruik in plaas van antwoorde gee.

Nie teen ontwikkeling nie. Boegobaai ontwikkeling. Die rob Kolonie, ou Nama grafte, Wat gebeur met dit? Bekommerd oor erfenis.
