A WARNING TO OIL, GAS AND MINING COMPANIES AND GWEDE AND BARBARA (Ministers of Coal/Oil and Selling Animals to the East)

Searcher Seismic is once again attempting to do a seismic survey in South Africa and in their flawed PPP (Public Participation Process) tried to exclude us. Big mistake. We climbed into a virtual meeting midday today - an hour afterwards and threatened the consultants with legal action and also provided them with LOCAL South African peer-reviewed research.

While we all need investment, mining and energy, our concern has nothing to do with development. The most major effect is on the environment and what that will do to livelihoods, the second thing is the fact that no one knows about this and the third thing is that all of this so-called development would be a good thing if it benefitted our companies, communities and people.

We asked for political affiliations and they refuse to give it. So any mining company will meet opposition from us in courts. We are done playing nicely with corrupt businesses too and those that believe this country and the communities they operate in are not their problem.

The time to pay for the damages you are causing in our communities across this country is coming!

Mantashe/Creecy, wait until you see what is coming for you. We have given you rope to do the right thing. I am unphased by your apparent power Gwede, you will soon learn what justice is - legally.
